Professional Summary:

An ambitious, motivated, and hard working junior full stack developer with a strong foundation in both front and back-end technologies. Eager to leverage education and hands-on projects experience to contribute to a dynamic development team. Committed to continuous learning and improving coding skills. Proven ability to quickly adapt to new technologies and work collaboratively in team environments.

Technical Skills:

Front-End: HTML, CSS, JavaScript, React.js, Next.js | **Back-End:** Node.js, Express.js, Java, C#, Python |

Databases: MongoDB, MySQL | **Version Control:** Git, GitHub | API Development and Integration |

Responsive Web Design.

Projects:

Car Rental Platform | Personal Project.

Developed a dynamic car rental platform utilizing Next.js framework, TypeScript, and API integration. Designed and implemented features to enhance user experience, streamline booking processes, and ensure efficient communication between frontend and backend systems.

Portfolio Website | Personal Project.

Developed a dynamic and responsive portfolio website using React. The site showcases my projects, skills, and experience, featuring a modern design and interactive elements to enhance user engagement. Emphasized clean code, reusable components, and best practices in React Development.

Simon Game | Personal Project.

Developed a classic Simon Game using JS and jQuery, demonstrating proficiency in frond-end web development. Implemented the game's core logic, including generating random sequences, managing user input and validating correctness.

Education:

Bachelor of Science in Computer Science, The Open University | 2019-Today.

Relevant courses: Data Structures & Algorithms, Database Management, Software Engineering.

Herzog Gymnasia High School, Graduated | 2018.

Completed advanced courses in mathematics and computer science. And developed a C# application for tracking and managing inventory in a retail store.

Professional Experience:

IT Support | KPMG | June 2020 – Today.

Assisted in troubleshooting software and hardware issues for over 1500 company employees. Collaborate with other IT team members to improve the overall performance of IT systems. Gained exposure to various development environments and tools used in professional setting. Participated in code review sessions and learned about development methodologies.
